

BugDorm-2M120 Insect Tent [BD2M120]

MegaView Science Co., Ltd.

<https://shop.bugdorm.com> · <https://megaview.com.tw>

Package Contents

- x1 Fabric Tent Body
- x8 Fiberglass Rods (2 spares)
- x4 Two-way Joints
- x4 Feet

Assembly

1. Push one foot onto one end of each of the four rods.
2. Push one rod, foot-end first, into each of the four sleeves of the trap. Foot prevents rods from puncturing sleeves.
3. Push a two-way joint over top of each rod used in Step 2.
4. Thread the remaining two rods through tabs on top of the tent to form an X.
5. Push the ends of these two rods into the top half of each joint used in Step 3 to erect the trap. Make sure rod ends are fully seated in the joints.
6. Lash ribbons around crossed rods.

Note

- * Operating Temperature: -10 to 60°C
- * The soft plastic floor is not waterproof.
- * Tent fabric is not UV treated. Avoid long-term exposure to direct sunlight.

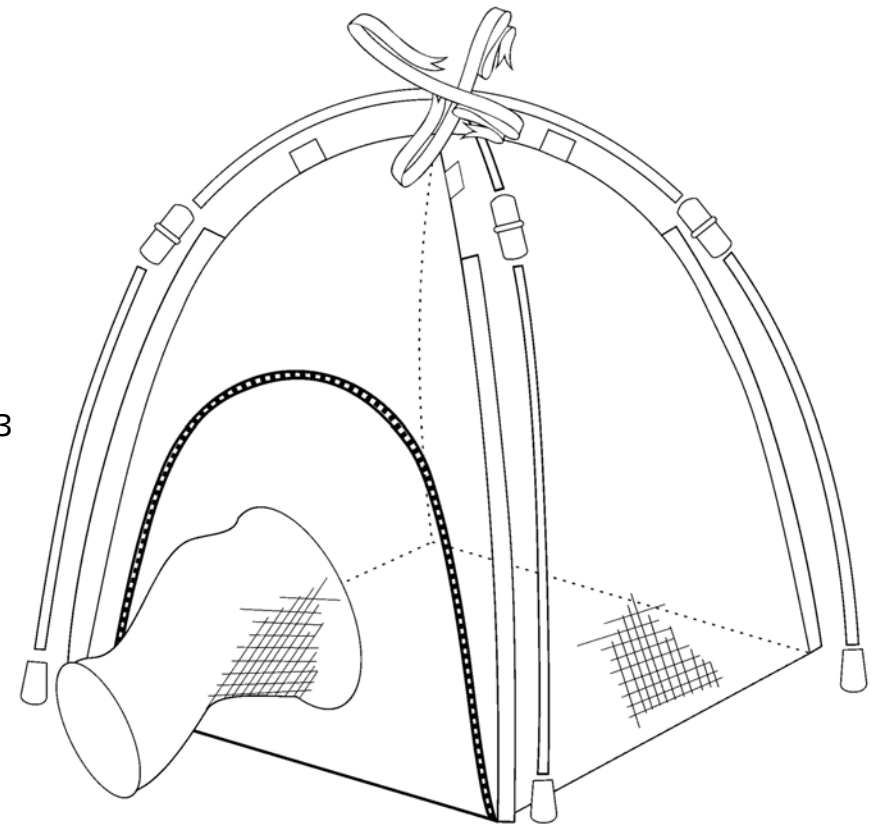

CLEANING HAND WASH: Submerge and soak the tent for 20-30 minutes in the mix

of detergent and water, agitate the tent gently, and then rinse the tent to remove the detergent.

MACHINE WASH: Use the side-loading laundry machine set on a washing cycle of low agitation and

low-speed spin. **CAUTION**: Wash tent body only. Wash at room temperature. Use laundry bag when machine wash.

Recommend applying neutral detergents. Apply bleach or stain remover with care, as those chemicals will weaken the tent fabric. Dry the tent in the shade.
